

# COLLEGE PROGRAMS OF STUDY

Seminole State College of Florida offers an Associate in Arts degree, Associate in Science degrees, Vocational Certificates, a Bachelor of Applied Science degree and Bachelor of Science degrees on four campuses, which are Altamonte Springs, Heathrow, Oviedo, and Sanford/Lake Mary. The Seminole State College catalog is available at [seminolestate.edu](http://seminolestate.edu).

Classes start every **January, May and August.**

Important: According to immigration regulations, international students must be full-time (12 credits) two consecutive semesters per year.

- **Associate in Arts Degree (A.A.)**

The Associate in Arts degree is a two-year program that covers all core material necessary for the first two years of a four-year bachelor's degree. Credits earned at Seminole State can be transferred to a four-year state college or university.

This degree is ideal for the student who wishes to obtain their bachelor's degree in a cost effective and successful manner. Attending Seminole State during the first two years will cost you about half the price of the first two years at a four-year college or university. On average, Seminole State College students who transfer into a four-year college or university perform better academically than third-year university students.

- **Associate in Science Degree (A.S.)**

The Associate in Science degree is a one- or two-year program designed to equip the student with the knowledge necessary to perform in a particular profession. Some programs can be transferred to a four-year college or university but should not be considered equivalent to the first or second year of a four-year degree. This degree is ideal for the student who wishes to work upon graduation from the program while maintaining the possibility of continuing their education in the future.

- **Vocational Certificate (V.C.)** (This requires an M-1 visa)

The vocational certificates are one or two-year programs that provide occupational preparation in applied technologies. In these programs, students learn the skills and knowledge necessary to secure and hold a good job. A vocational certificate is not transferable to a four-year college or university. This certificate is ideal for the student who wishes to work and earn a good salary in the applied technologies field upon graduation.

- **Bachelor of Applied Science (B.A.S.)**

We offer the following four-year Bachelor of Applied Science degree: Interior Design

- **Bachelor of Science (B.S.)**

We offer the following four-year Bachelor of Science degrees: Business and Information Management, Construction and Engineering Technology
